# What is a Custome ChatGPT?

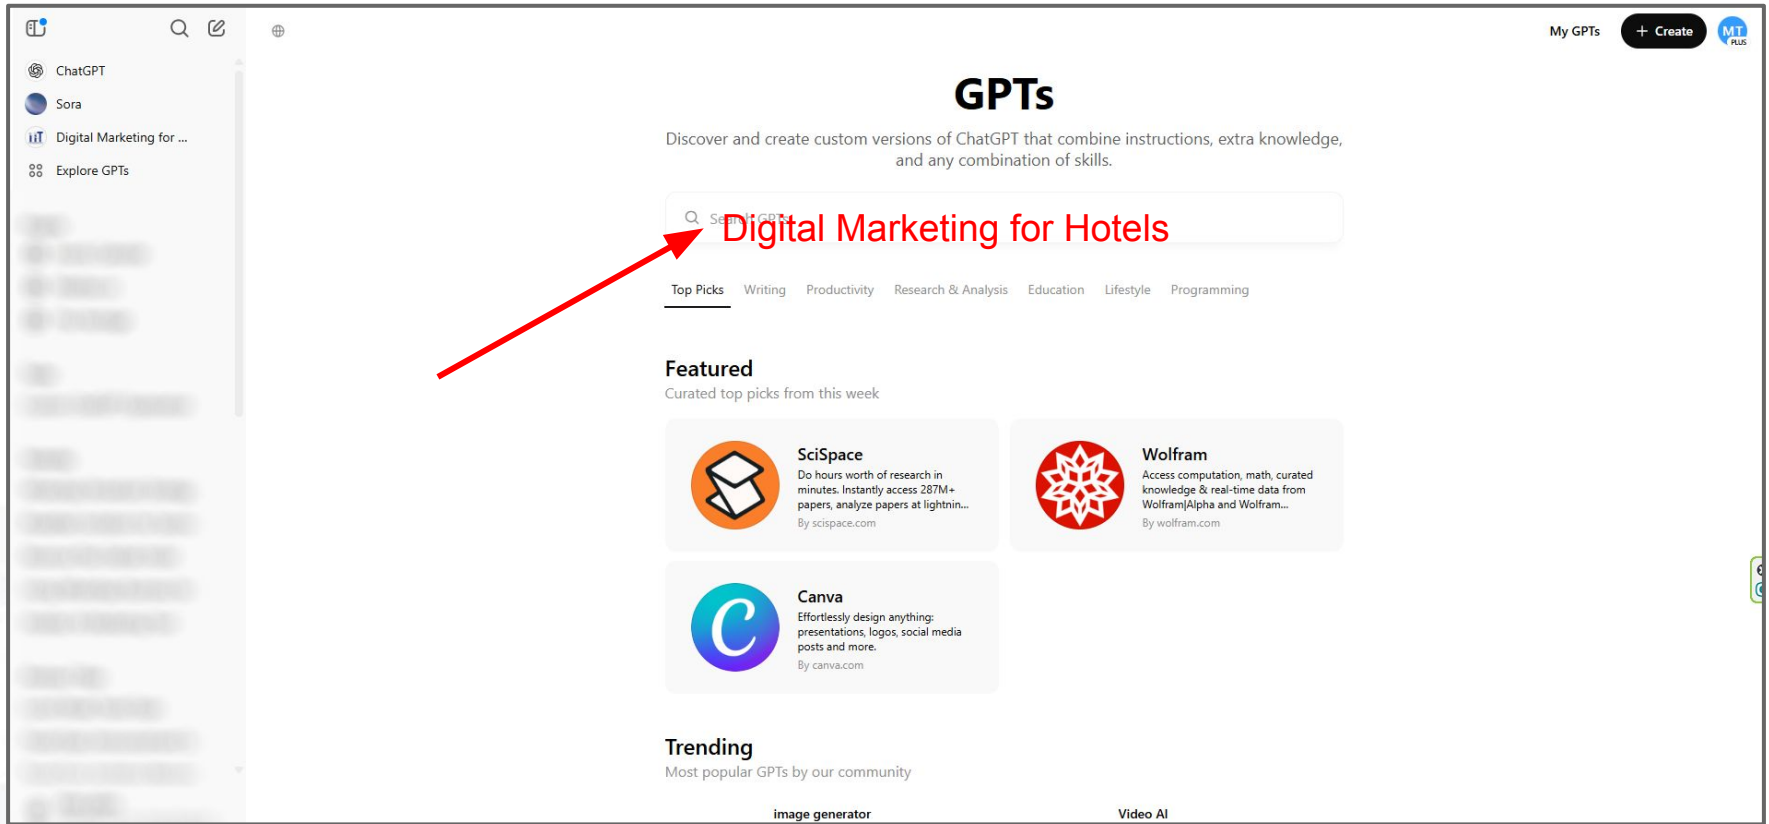

# What is a Custom ChatGPT?

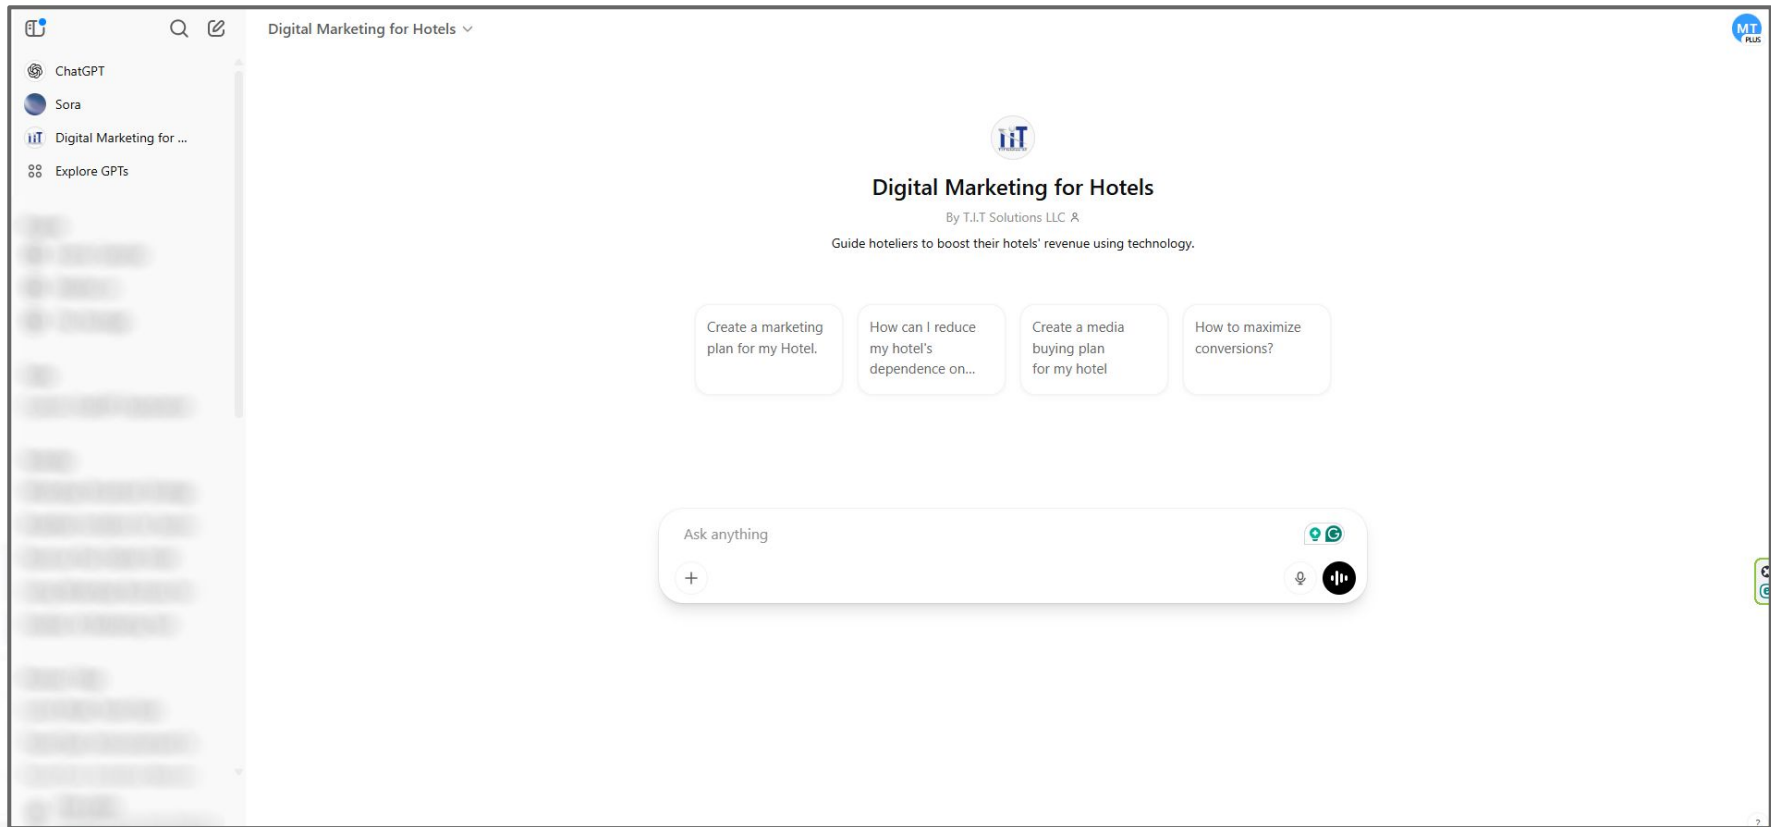

---

A Custom ChatGPT is a version of ChatGPT that's been personalized or fine-tuned for a **specific use case, business, or goal**.

Instead of being a general-purpose assistant, it has unique instructions, tools, and knowledge tailored to serve a particular audience or industry

# Privacy & Data Use Disclaimer

## Privacy by Design

1. This tool is built with a strong commitment to privacy.
2. No personal or sensitive data is stored, retained, or shared between users.
3. All individual sessions are kept confidential.

## Shared Knowledge Pool

1. While user inputs remain private, the tool benefits from an ever-growing pool of generalized knowledge.
2. Insights are continuously refined to improve responses and relevance across the hotel marketing landscape.
3. This ensures smarter, more tailored support over time without compromising user privacy.

## Bias for specific brands!

1. It might mention some brands that we use frequently more than others.
2. This is expected to be corrected when we go public, which is happening now!

Your privacy is protected.  
Your growth is supported.

# How to Give the Best Instructions (Prompts)

## Be Specific

---

**Clearly describe what you want. Include details like your hotel type, goals, timeframes, or challenges.**

**Example:**

“Create a 3-month social media plan for a boutique hotel in Dahab focusing on increasing direct bookings.”

# Provide Context

---

**The more background you give,  
the more relevant the response.**

## **Example:**

"We currently rely 40% on OTAs.  
Help me reduce this by improving  
my website and email marketing."

# Ask Follow-Ups

---

**Treat it like a conversation—ask deeper questions, request revisions, or explore ideas further.**

## **Example:**

“Can you break that campaign into weekly tasks?”

# Use Action Words

---

Start prompts with verbs like  
"Create," "List," "Suggest,"  
"Improve," or "Compare."

As if you are instructing an assistant.

4

**Let's test it live!**

# Use Cases

---

1. Conversation starters (updated according to Egypt/GCC/NA needs)
2. Whatsapp Business Setup
3. Create a marketing plan.....
